

Microbial Management Program

Drawing on more than 30 years of expertise, Advanced Microbial Sales utilizes their Microbial Management Program to treat and degrade sludge and solids in wastewater systems. This program leverages unique blends of bacteria to break down organic waste, optimizing the efficiency of wastewater treatment processes. With our extensive experience in research and application, we offer customized solutions that improve system performance and support environmental sustainability.

Program Includes:

- ✓ Sonar Readings
- ✓ Water Sample
- ✓ pH & Dissolved Oxygen Report
- ✓ Nutrient Report
- ✓ Microscopic Analysis
- ✓ Microbial Product Application
